# Britannica – Shaping the future

**Britannica Online School Edition has 4 age-specific learning and information areas**

**Written and edited to the correct reading and knowledge levels, Britannica encourages students to research and build a foundation of confident learning from reception through to A-level.**

- **Britannica Learning Zone (ages 4 to 7)** – fun and informative activities for early learners covering Numeracy and Literacy.
- **Primary Britannica (ages 5 to 11)** – helps young students engage with themed based subjects to inspire continuous discovery.
- **Student Britannica (ages 12 to 16)** – builds confidence and research skills for curriculum based subjects, supported with visual, interactive and assessment material.
- **Encyclopædia Britannica (ages 16 and above)** – Encourages an in-depth learning journey into a vast and detailed library of information. Students can expand their research using the integrated supporting materials from the likes of EBSCO, Primary Sources and reviewed external web links.

## **With Britannica Online you can:**

- **Deliver engaging lessons:** Create engaging lessons to be delivered in the classroom through different formats whether that would be through the whiteboard, a Power Point presentation or printed material. Britannica's material gives you access to articles, images, videos and pre-prepared lesson activities.
- **Plan lessons using any of the Britannica content:** You can search, link drag and drop or cut and paste any Britannica content to use when creating lesson plans.
- **Easily create homework assignments:** Britannica Online allows you to create interesting and relevant assignments for students through the "workspace".
